**Have you had YOUR Comprehensive Blood Lab Testing done yet for this year?**

**Find out what your body may be missing for optimal health with a Comprehensive Blood Lab Panel.**

## Too many people suffer every day with:

Low Energy • Fatigue • Slow Metabolism  
Weight Gain • Thyroid Problems  
Body Aches and Pain • Hormone Issues  
Digestive Problems • Menopause Symptoms  
Poor Sleep • Skin Problems  
Anxiety • Depression • ADD / ADHD  
Food Sensitivities • Autoimmune Conditions  
and Much More!

The answers to these problems can be found within your body chemistry!

Using the results of blood lab testing is one of the most scientific ways to determine which dietary, nutritional and lifestyle changes are necessary to help you feel better and function better.

This lab testing will be some of the most comprehensive and least expensive you will find anywhere. We've partnered with a lab in the Twin Cities to bring you this testing at a HUGE discount of only \$199. This same Comprehensive Lab Panel would cost you anywhere from \$1000 - \$3000 at your local medical clinic or hospital.

Lab testing through our office will be one of your best options to save money if you have a higher health insurance deductible. This lab testing is usually covered by any type of Healthcare Savings Account (HSA), or other Medical and Flexible Spending Accounts.

## What items are tested in this Comprehensive Blood Lab Panel?

**70 - 80 individual items are tested in this comprehensive lab testing to include:**

Glucose, Hemoglobin A1c, Uric Acid, BUN, Creatinine, eGFR, BUN/Creatinine Ratio, Sodium, Potassium, Chloride, Carbon Dioxide, Calcium, Phosphorus, Magnesium, Total Protein, Albumin, Globulin, A/G Ratio, Total Bilirubin, Alkaline Phosphatase, LDH, AST, ALT, GGT, TIBC, UIBC, Serum Iron, Iron Saturation, Serum Ferritin, Total Cholesterol, Triglycerides, HDL, LDL, VLDL, HDL/Cholesterol Ratio, C-Reactive Protein, Homocysteine, TSH, Total T4, T3 Uptake, Free Thyroxine Index, Total T3, Free T3, Reverse T3, Free T4, TPO Antibody, Thyroglobulin Antibody, Vitamin D 25-Hydroxy, Fibrinogen Activity, WBC, RBC, Hemoglobin, Hematocrit, MCV, MCH, MCHC, RDW, Platelets, % Neutrophils, % Lymphocytes, % Monocytes, % Eosinophils, % Basophils, Absolute Neutrophils, Absolute Lymphocytes, Absolute Monocytes, Absolute Eosinophils, Absolute Basophils, % Immature Granulocytes, Absolute Immature Granulocytes, and a Complete Urinalysis with Microscopic Examination.

Other lab tests may be recommended based on your specific needs.
